Track, report & evaluate

Accurate Vehicle Tracking

- See where your vehicles are instantly, very useful if you need urgent call outs
- Integration with Google Maps makes the software extremely user friendly
- Routes are colour coded to show speed at each stage of the journey

Timesheet Reports

- Save time and get daily timesheet reports for drivers or groups of vehicles
- Monitor journeys by seeing details including start / finish times, arrival at first destination and departure from last destination
- Track whether vehicles are being used out of hours

Driving Style Analysis

- Monitor safety of drivers by viewing their speed, braking and acceleration scores
- Compare the speed of your drivers
- Evaluate how driving styles can be improved to prevent risks of accidents and reduce fuel consumption

Reduce fuel
consumption
by up to

25%

Improve overall
productivity
by up to

15%

Reduce employee
overtime
by up to

15%

Increase vehicle
utilisation
by up to

20%

More than just tracking...

Improve Driver Safety

- Safe speed database means drivers will know the safe speeds on their journey
- League table style reports to see which drivers are performing best
- Educate drivers about safe speeds and show them the league table to show how they are doing

Specify Authorised Areas

- Set up prohibited zones to prevent employees making unauthorised journeys in working hours
- Set up mandatory zones, this is an area where a vehicle must remain in
- Email alerts can be set up, so you can be notified instantly about a drivers whereabouts

Detailed Reporting

- Easily make sense of mileage and fuel costs and identify the best / worst drivers
- Detailed & user friendly reports / timesheets sent to your inbox
- Reports can be viewed on mobile and computer, so you can access them wherever you may be

Lower total
miles driven
by up to

10%

Decrease
idling
by up to

30%

Don't just take our word for it...

There was an element of investment in the equipment for the vehicles and I can confirm that we recovered this expenditure within one calendar month of installation. We now have an up to the minute record of where our staff are, at what speed they are travelling with a history of all vehicle movements.

This has enabled us to improve on our customer service as we are able to advise customers of arrival times, it provides a time sheet system for our engineer, it has improved on fuel economy and staff working time and adds to staff safety as they ensure that their driving is of a high standard. I can safely say that we only wish we had put this in years ago.
